

# FedHIVE

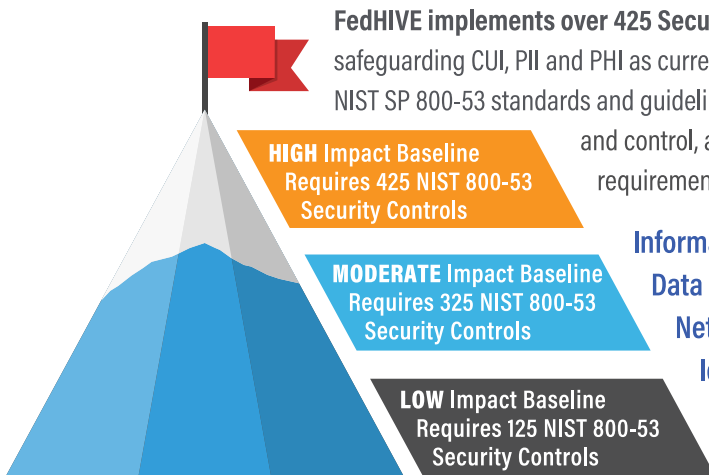

*Protecting and Delivering U.S. Government High Impact Applications and Data Every Day.*

## WHAT IS FedHIVE?

FedHIVE: an HRTec product, that is a secure hosting, storage and processing service that provides a Federal High Impact Virtualized Environment (FedHIVE) provision within a physical and logical boundary.

FedHIVE is designed to provide Federal clients (Civilian, Defense and Contractor agencies) a compliant, scalable, and secure infrastructure capability enabling and supporting Cloud Service Offering (CSO), for Infrastructure as a Service (IaaS) / Platform as a Service (PaaS) solutions that meet or exceeds the FIPS PUB 199 System Security Level of High (sensitive but unclassified information) security controls in which to implement organizational Software as a Service (SaaS) applications required for their business or mission success.

FedHIVE is intentionally designed to meet and exceed the FedRAMP High Impact Baseline and DoD Cloud Computing Security Requirements Guide.

**FedHIVE implements over 425 Security Controls** for safeguarding CUI, PII and PHI as currently defined in NIST SP 800-53 standards and guidelines for security, privacy and control, and compliance requirements specifically for:

- Information Safeguarding - Scalability
- Data Encryption - Privacy Protection
- Network Connectivity - Data Management
- Identity Management - Continuous Monitoring

## THE FedHIVE JOURNEY

For over 36 years HRTec has served the Armed Forces Community, Federal Agencies, Non-Profits, and private industry with secure networks and hosted government system solutions. As a HUBZone Certified Small Business, Microsoft Partner and GSA IT Schedule 70 Contract holder we continuously evolved and provide high quality customer security support.

In 2017, HRTec launched FedHIVE as a Cloud Service Offering (CSO) for Infrastructure as a Service (IaaS) / Platform as a

Service (PaaS), FedHIVE is all about safeguarding agencies CUI (including PII and PHI) and is assessed as FedRAMP Ready JAB (P-ATO) at the High Impact Baseline and can be found in the FedRAMP Marketplace as a FedRAMP High Impact Baseline Cloud Service Offering.

HRTec believes in the big bank vs. little bank philosophy where we can provide the customer with cost effective solutions, a high ROI and predicable budget outlay. To us as a small business you're not just a number, we make you our top priority.
